The radiation survey is approximately halfway complete. The current plan is to have the crew land locally and begin the upload of data.

The on board screening did not detect any compounds in the library. I am attaching an example of the .txt report from one line of data.

Also attaching the latest flight track. The full data sets will be reviewed once downloaded. Any issues will be reported

verbally followed by a draft report. The Google Earth data link will follow later. Call if you have questions.
